

Polymer Analysis and Testing

Our goal is YOUR success!

APL provides answers to your manufacturing questions.

Reports contain all data and a complete summary of the results in an easy to understand format and language.

New Product Development

- Associated Polymer Labs develops new products for customers.
- Over 20 years experience in product development from concept to product launch.

Competitor Evaluation and Deformulation

- Answer your questions about your competitor's product.
- Expertise in (reverse engineering) deformulation materials:

Materials Identification

- Unknown materials or contamination can often be the underlying cause of many difficult problems.
- In-house databases and libraries quickly identify the material.

Failure Analysis

- Experience in the investigation of product defects and product failures.
- Perform a comparison of "good vs. bad" product or the raw materials.

Quality Assurance Programs

- QA program to customers that require material testing on a regular basis.
- Document, test, report and database all the results for you and send you up-dated copies.

Manufacturing Problems

- Identifying problems with the raw materials that cause product failure or major product recalls.
- Services available in reducing scrap and improving product yields.
